## EXPERIENCE

### Lead Event Management & Operations , MENA Women Business Club

Sep 2024 - Present

- Led cross-functional teams to organize tech-enabled virtual events and webinars.
- Implemented digital tools and platforms for seamless event execution and participant engagement.
- Analyzed event data to optimize performance, improving future event processes.
- Managed logistics and troubleshooting for online platforms, ensuring smooth operations.
- Coordinated with stakeholders using project management software to streamline event workflows.

Technologies: Zoom, Microsoft Teams, Google Meet, Trello, Slack, Eventbrite, Hopin, Google Analytics, Excel.

### Technician Intern, Tunisia Telecom Gafsa

Aug 2024 - Sep 2024

- Development of a Complaint Management Application for Equipment BTS and IPMSAN
- Designed real-time tracking features to monitor equipment status using Firebase for backend support.
- Integrated map-based localization with Google Maps API for efficient field operations.
- Developed CRUD functionalities for seamless management of equipment data.
- Implemented data analytics to analyze complaint trends using SQLite for local storage.

Technologies: Android SDK, Java, Kotlin, Firebase, Google Maps API, SQLite, Retrofit, and MVVM architecture

### IoT Internship at Emertxe , India (remote)

Jul 2024 - Sep 2024

- Developed a scalable home automation system allowing users to remotely monitor and control appliances via the Blynk IoT app.
- Automated garden lights control using an LDR sensor to adjust brightness based on sunlight availability.
- Integrated temperature control with an LM35 sensor to manage room temperature, controlling heater and cooler systems through the app.
- Designed a water tank management system to monitor water volume and control inlet/outlet valves based on predefined thresholds using serial communication.

Technologies: Arduino, Blynk IoT Platform, C/C++, PicSimLab

### Communication & Marketing Manager, Enactus Gafsa University

Sep 2023 - Sep 2024

- Managed media and partner relations to enhance media coverage.
- Analyzed market data and trends to guide strategic decisions.
- Supervised a team to ensure effective communication and marketing execution.
- Developed and implemented comprehensive social media strategies.
- Fostered strong relationships with key stakeholders to support organizational objectives.

Technologies: Google Analytics, Tableau, Buffer, Adobe Creative Suite (Photoshop, Illustrator, Premiere Pro)

### Initiation internship , Gafsa Phosphate Company

Aug 2023 - Sep 2023

- Designing a user-friendly interface for employee management using Laravel resources.
- Creating pages for adding, editing, and displaying employee information.
- Setting up routes and controllers to handle CRUD operations.
- Configuring the database using migrations to ensure optimal structure.
- Implementing pagination for efficient data display.
- Integrating charts to visualize business statistics and facilitate performance analysis.

Technologies: Laravel, HTML, CSS, Bootstrap, draw.io, MySQL, JavaScript, jQuery, Chart.js, and Git

### Gender Data for Inclusive Program Development , TechChange

May 2023 - Aug 2023

- Acquired foundational knowledge of gender data and best practices for impactful program development.
- Applied data analysis techniques to limit biases and close gender gaps using Python, Excel, and SQL.
- Created infographics and participated in open-source geo-mapping activities to visualize gender data.
- Developed actionable steps for integrating gender data into development programs.

Technologies: Python, Excel, SQL, Open-source geo-mapping tools.

## EDUCATION

ISSAT ,Gafsa, Internet of Things and Embedded Systems, Applied Bachelor's Degree in  
Computer Systems Engineering

2022 - 2025

IPEIM, Monastir , Pre-Engineering Program: Mathematics and Physics

2021 - 2022

Pioneer's High school of Gafsa , Baccalaureate with honors (15.24/20)

2020 - 2021

SKILLS

- Programming & Data Analysis : Python, SQL,
- Libraries/Frameworks: Pandas, PyTorch, TensorFlow, NumPy, Scikit-learn.
- Hardware/Software IOT : Arduino, VHDL, Blynk IoT Platform, PicsimLab , TinkerCad
- Ethical Hacking: Kali Linux ( Metasploit, Nmap, Wireshark, Burp Suite, John the Ripper, SQLMap)
- Object-Oriented Programming: Java ,JS, c++
- Databases: MySQL, MongoDB, SQL, Firebase
- Front-end: HTML, CSS, JavaScript.
- Back-end: PHP, Laravel, MERN (MongoDB, Express.js, React, Node.js)
- Development/IDE: Visual Studio, Git, GitHub, Jupyter Notebook, PyCharm, IntelliJ IDEA, Android Studio
- Systems: Linux, Windows
- Application Development : Visual Studio, Kotlin , Flutter , Java
- UI/UX Design : Adobe Photoshop, Figma, Canva

ACHIEVEMENTS & CERTIFICATES

|                                                               |      |
|---------------------------------------------------------------|------|
| Vice Champion at the Enactus Tunisia National Exposition 2024 | 2024 |
| SCRUM Fundamentals -SCRUMStudy                                |      |
| Ethical Hacker - Cisco                                        | 2023 |
| Intermediate Deep Learning with PyTorch - DataCamp            | 2024 |
| Cyber Threat Management - Cisco                               | 2024 |
| Junior Cybersecurity Analyst - Cisco                          | 2024 |

LANGUAGES

- Arabic : Native
- French : Bilingual
- English : Professionnal
- German : Basic

HOBBIES

Reading, Video Games, Graphic Design
